

Tough Skin

Where safety is of utmost importance Tough Skin safety coating provides the greatest protection against glass shards from broken bulbs. Incandescent, halogen, fluorescent, compact fluorescent and HID types are all available with Tough Skin coating. Most commonly used for food preparation, restaurants, gymnasiums, hospitals and storage areas

Incandescent

- A Types
- Reflector Types
- Tubular

Halogen

- Reflector Types

Fluorescent Compact Fluorescent

- Standard Linear T5, T8, T12
- High Output
- T5
- Plug In compact fluorescents
- Self Ballasted fluorescents

HID

- Metal Halide
- HPS
- Mercury Vapor

Germicidal

- Used in air and water purification applications
- Common applications are in Hospital/Healthcare facilities, food processing plants and other commercial uses where it is important to eliminate biological contaminants.

Item	Watts	Bulb	Base	Nom Length	Pkg
G4T5	4	T5	MINI BIPIN	6"	24
